

600-10

Intended for auto shops, power plants and other narrow environments, the 600-10 carries a large oxygen and a medium acetylene cylinder front to back, rather than the traditional side-to-side method, saving you valuable inches. This two-tiered design maneuvers easily through the tightest spots.

Key features:

- Front-to-back loading style saves space when you need it
- Available with a firewall

SAFTCARTTM
